This book is an authoritative narration of facts about the people of Southern Sudan and the controversial Israeli involvement in Southern Sudan. The revelatory aspect of this book could be summarized as follows:

1. The Israeli "alliance of the periphery" policy was a success story in the history of the liberation struggle by the people of Southern Sudan against the Arab Islamic hegemony in the Sudan.
2. Through this alliance, Israel was able to transform a ragged militarized civil rebels (Anya nya) into a modern, structured, and disciplined fighting machine that became a power that influenced the Sudanese politics and reparation of Southern Sudanese dignity.
3. The Israeli support to people of Southern Sudan provided the basic tools needed that made it possible for people of Southern Sudan to do the rest in the years to come later.
4. The support gave Southerners the hope and determination needed to oppose oppression and political subjugation.
5. The intervention provided bases for unity among Southerners in the three provinces of Equatoria , Bahr-el-Ghazal and upper Nile who have been fighting among themselves before intervention. Such unified efforts against the common enemy became the foundation of Southern Sudanese nationhood today.
6. The Anya nya commanders trained by Israel, became the future leaders of the second liberation war and are now the leaders of the independent Republic of South Sudan.
7. The Anya nya infrastructure provided the road map for the final liberation of Southern Sudan.
8. The amazing thing about the Israel's support to Southern Sudan is the lack of strings attached to the aid. Prime Minister Golda Mayer made it clear from the beginning that: " if and when the Southerners have a chance of reaching a peace agreement with the north, the state of Israeli will not stand in their way " Israel never intended to take advantage of Anya nya by using them to tie down the Arab army in Sudan.
